Avenue of the Baobabs & Beyond®

The world famous **Avenue of the Baobabs** is an extraordinary stand of huge baobab trees, *Adansonia grandidieri*. Located 30 minutes north of the town of **Morondava** on the west coast, it is one of the most visited sites in Madagascar.

Several of the trees reach a height of 30+ meters and are over 800 years old.

The **Avenue of the Baobabs** is a photographers paradise and especially beautiful at sunset and sunrise.

Excursions Include: Transportation by 4X4 (driver & fuel) and visit to the **Baobabs in Love**.

For those with a special interest in baobabs (succulents, orchids and other fauna) we offer extended tours to seldom visited / hidden groves of trees near Morondava area.
